

Private Cloud for Oracle Software

What is Private Cloud for Oracle Software?

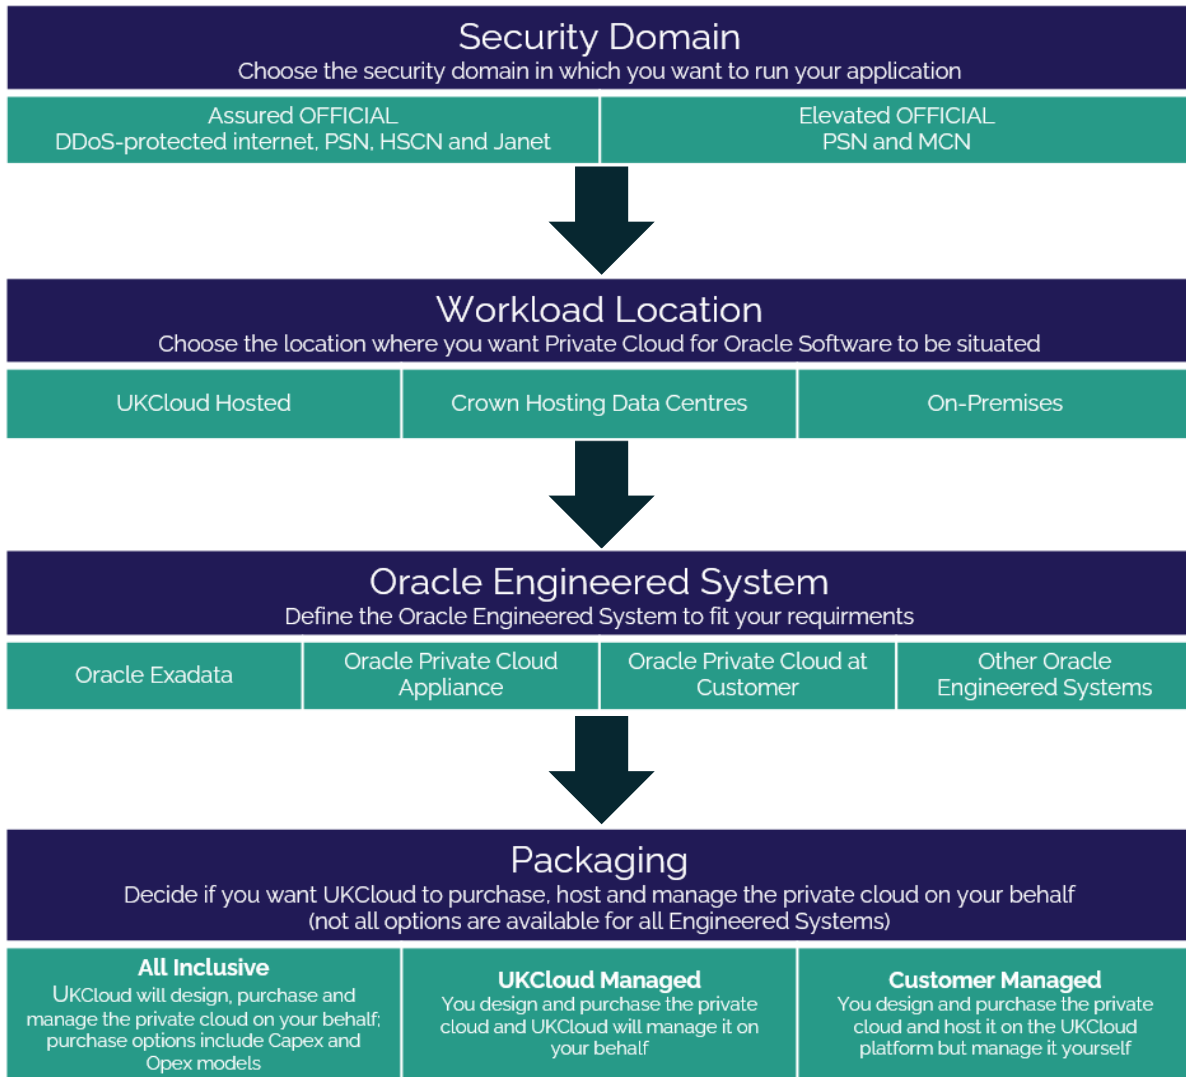

Private Cloud for Oracle Software enables you to have private implementations of Oracle's Engineered Systems within UKCloud's assured, sovereign data centres, Crown Hosting Data Centres or even on-premises. It enables you to have a tailored Oracle environment specifically for the high performance or big data analytical platforms that are proprietary to Oracle, while connecting to workloads that you have within the rest of our multi-cloud ecosystem.

What the service can help you achieve

- Retain your investment in Oracle licensing
- Use specialised Oracle hardware such as Oracle Exadata to boost performance of mission-critical applications
- Condense your infrastructure footprint by hosting existing Oracle Engineered Systems within UKCloud and moving other workloads into the multi-cloud platform
- Improve data locality by having your Oracle systems right next to your other workloads in the cloud
- Leverage Oracle PaaS (for example, Fusion Applications and Enterprise Database) to develop new applications in a safe and secure environment

 **Product options**

The service is designed to be flexible and enables you to mix and match from a range of pre-defined options for each virtual machine and change them when required.

Pricing and packaging

Private Cloud for Oracle Software pricing can be as low as £2,000 per month. Full pricing with all options is available in the [UKCloud Pricing Guide](#).

All-inclusive		
Upfront payment – design and installation	From £20,000	
Monthly charge – platform fees	1/8 rack: From £12,000	Full rack: From £50,000
Customer Managed		
Upfront payment – design and installation	From £10,000	
Monthly charge – platform fees	1/8 rack: From £2,000	Full rack: From £16,000
UKCloud Managed		
Upfront payment – design and installation	From £20,000	
Monthly charge – platform fees	1/8 rack: From £12,000	Full rack: From £50,000

Accreditation and information assurance

The security of our platform is our number one priority. We've always been committed to adhering to exacting standards, frameworks and best practice. Everything we do is subject to regular independent validation by government accreditors, sector auditors and management system assessors. Details are available on the [UKCloud website](#).

Connectivity options

UKCloud provides one of the best-connected cloud platforms for the UK public sector. We enable access to our secure platform by DDoS-protected internet, PSN, Janet, HSCN, MCN and your own leased lines via our HybridConnect or CrownConnect services. The full range of flexible connectivity options is detailed in the [UKCloud Pricing Guide](#).

An SLA you can trust

We understand that enterprise workloads need a dependable service that underpins the reliability of the application to users and other systems, which is why we offer one of the best SLAs on G-Cloud. For full details on the service SLA, including measurements and service credits, see the [SLA Definition](#) article on the UKCloud Knowledge Centre.

Service level agreement	99.99%	
Portal level agreement	99.90%	
Measurement of SLA	Applies to All-Inclusive and UKCloud Managed	Availability of all or part of the Private Cloud for Oracle Software.
	Applies to UKCloud Hosted	Availability of power and cooling to your Private Cloud for Oracle infrastructure.
Key exclusions	Applies to All-Inclusive and UKCloud Managed	Deletion or modification of files by customer resulting in data loss. Any access provided by you to your user base that takes the Oracle system beyond its recommended performance and connectivity thresholds. Faults within external connectivity providers and customer components co-located at UKCloud. Any connectivity between data centres that is out of the control of UKCloud.
	Applies to Customer Managed and UKCloud Managed	As above, plus any loss of connectivity or data including data corruption as a result of you or your suppliers installing new or additional components into the system.
	Applies to UKCloud Hosted	As above, plus any platform outages of the Private Cloud for Oracle Software infrastructure caused by the party managing the Oracle infrastructure hosted within UKCloud, or by failures at the physical or logical infrastructure layer outside of UKCloud's responsibility.
	Applies to CHDC hosted or On-Premises	As above, plus any platform outages of the Private Cloud for Oracle Software infrastructure caused by DC failures outside of UKCloud control.

The small print

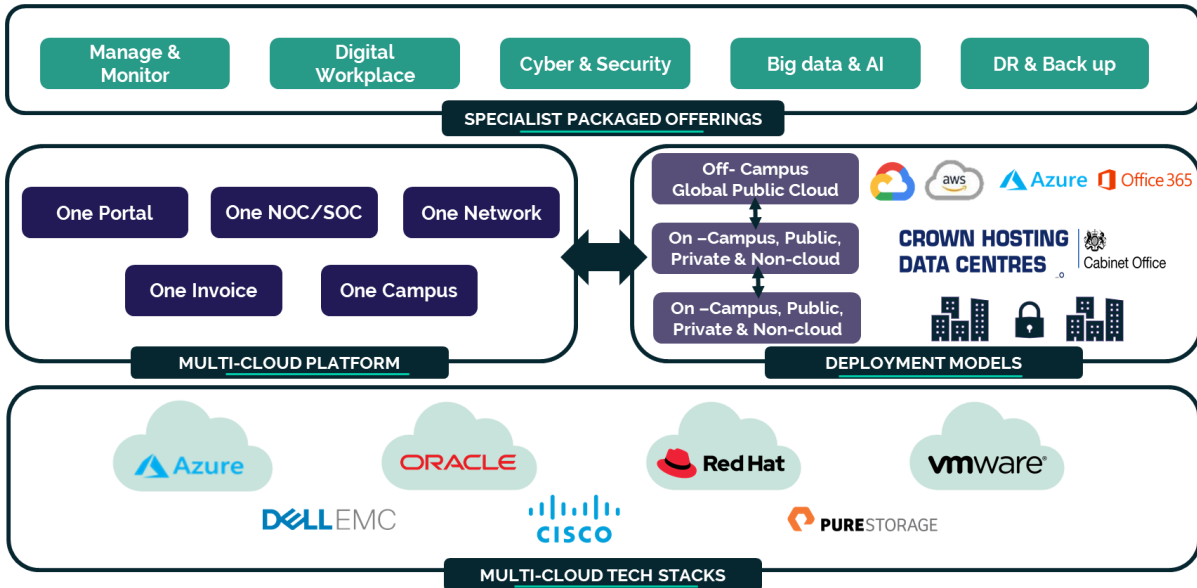

Private Cloud for Oracle Software operates a minimum commitment of 24 months. Early exit charges apply if you exit this service whilst still within the minimum commitment term. If you exit the service within the minimum commit then UKCloud will bill all the remaining committed term's fees and asset costs within the final invoice.

For full terms and conditions, including onboarding and responsibilities, refer to the [Terms and Conditions documents](#).

Why UKCloud?

UKCloud is dedicated to the digital transformation of our nation’s public services through our flexible, secure, and cost-effective multi-cloud platform and the expertise of our people and partners. We believe that diversity of technology drives value and innovation and so we bring together different cloud technologies, with different deployment models spanning on-premises (private cloud), on-campus (Government’s Crown Campus) and off-campus global public cloud services. This enables you to choose the right cloud for creating new workloads or migrating or replacing existing applications to the cloud with specialist SaaS solutions.

We recognise the importance of public services to UK citizens and businesses, which is why we include the highest level of support to all our customers at no extra cost. This includes dedicated 24/7 UK support, a Network Operations Centre (NOC), utilising protective and proactive monitoring tools, and access to UKCloud’s experts. UKCloud can also provide outcome-based professional services or managed services to help you with digital transformation.
