

Moogsoft AIOps

Artificial Intelligence for Modern IT Ops and DevOps

Our patented machine-learning algorithms, built for IT Ops & DevOps, reduce alert volumes, automate alert correlation and streamline collaboration across teams, tools and production stacks – all in real time.

Key Benefits

- Deliver unified visibility across production stacks
- Eliminate operational noise and alert fatigue.
- Automate event correlation across tools
- Provide proactive warning of production incidents
- Streamline team workflow and collaboration.
- Capture, codify, and reuse team knowledge
