ukcloud X

Keeping our nation safe

A UK sovereign High Assurance cloud platform which meets the rigorous security requirements of UK workloads.

A new platform for new possibilities

In the recently published Strategic Defence and Security Review (SDSR), Theresa May cautioned that we're facing intensifying and evolving threats and a range of complex challenges at home and overseas. UKCloudX underpins the National Security Doctrine (aka Fusion Doctrine) by providing a genuine High Assurance cloud platform which brings together specialist capabilities and insights across government and industry partners.

A common platform makes it easier for government to exploit the benefits of collaboration and the application of leading edge technologies such as AI and Machine Learning. A common platform gives our police, military and intelligence officers all they need to keep our nation safe.

"We believe there is a benefit in modernising the systems and platforms that are used to support requirements that are classified above 'OFFICIAL'", said Danny Wootton, ISS Hd Innovation, UK Ministry of Defence. "I fully support the intent of bringing the agility, cost-effectiveness and rich functionality of a High Assurance cloud platform to projects operating at higher classification levels. I applaud industry providers like UKCloudX that are willing to make the necessary investments to create a platform that could enable much faster innovation in this space."

Together enhancing the UK's national security

Solution providers

UKCloudX powers a growing community of solution providers that are focused entirely on helping you achieve your mission. They harness our platform to deliver outcome-based solutions from specialist SaaS applications to the largest BPO.

BOEING · CACI EVER VIGILANT · Capgemini · CIVICA · CGI · Deloitte.

HIVE LOGIC · IBM · kahootz · leidos · LEONARDO · nine23 Enterprise Mobility, Managed

Roc · netconsulting · ROLLS ROYCE · sopra steria · SiXworks Secure by Design

Technology partners

Our technology partners deliver best in class cyber components that serve to provide higher assurance to our customers, whilst being non-exclusive to UKCloudX so you avoid lock-in.

"We believe UKCloudX will add an extra dimension to the highly secure solutions that we deliver to the Defence and National Security sector"
Matt Franklin, CEO at Roc.

"We welcome UKCloudX's investment in delivering the UK's first High Assurance cloud platform from within our datacentre facilities. Our dedicated campus approach delivers security without compromise"
Huw Owen, CEO at Ark Data Centres

We keep our nation safe and help Defence & National Security organisations to:

- Innovate through experimentation
- Drive new insights through secure collaboration
- Reduce the time, cost and risk of IT systems
- Solve complex and sensitive challenges
- Deliver critical systems within our UK sovereign platform, adjacent to Crown Hosting with security cleared staff
