

## RUNAWAY COSTS

**Learn** how to identify 'hidden' costs that are often difficult to predict and control.

**Plan** to reduce your commercial exposure.

**Act** now to understand current costs and how they can be optimised.

## AFFORDABILITY

**Learn** about specialist providers that operate within the government's Crown Campus.

**Plan** to modernise legacy applications by connecting multiple clouds to your existing systems.

**Act** now to evaluate the extent of cost overruns.

## TRADITIONAL SYSTEMS

**Learn** the key differences between cloud-native architectures and traditional applications.

**Plan** to identify your existing applications and determine how each of them fits into a multi-cloud approach.

**Act** to enable your teams to experience how familiar the cloud is to existing environments.

## MAINTAINING LEGACY APPLICATIONS

**Learn** how the Crown Campus is designed for public sector solutions that are not ready for global cloud.

**Plan** to determine how specialist public cloud and private cloud services could work alongside global options.

**Act** to validate how easy and affordable it is to integrate specialist cloud environment into your existing estate.

## SKILLS AND CAPABILITY GAP

**Learn** what skills and resources are currently available to your organisation (including Third Party).

**Plan** to map your existing skills and resources to a multi-cloud strategy.

**Act** using an approved framework and commission outcome-based projects from specialist cloud providers.
