

## CONCENTRATION RISK

**Learn** how the National Audit Office and the European Banking Agency position concentration risk.

**Run** a discovery exercise to determine where all your datasets and applications are hosted.

**Track** concentration risk at a board level to help avoid over exposure to a handful of vendors.

## VENDOR LOCK-IN

**Understand** why analysts and commentators advocate a multi-cloud strategy.

**Plan** to introduce governance through a Technical Design Authority to stop the use of proprietary cloud features.

**Create** an actionable plan to migrate existing applications to multiple cloud services.

## AFFORDABILITY

**Learn** about specialist cloud providers that operate within the government's Crown Campus.

**Plan** to modernise legacy applications by connecting multiple clouds to your existing systems.

**Act** now to evaluate the extent of cost overruns.

## SECURE AND SENSITIVE SYSTEMS

**Understand** how the government's Crown Campus is designed for the nation's most secure and sensitive services.

**Conduct** a Cloud Discovery Workshop to determine how specialist cloud providers can complement hyperscaler technology.

**Run** a Proof of Value exercise to determine ease and affordability.

## SKILLS AND CAPABILITY GAP

**Learn** what skills and resources are currently available to your organisation (including Third Party).

**Plan** to map your existing skills and resources to a multi-cloud strategy.

**Act** using an approved framework and commission outcome-based projects from specialist cloud providers.
